AUGUST 2021
LISTOS CALIFORNIA EMERGENCY PREPAREDNESS CAMPAIGN

Far too often, the people and communities hardest hit by natural disasters are those least equipped to survive them. The Listos California Emergency Preparedness Campaign helps highly vulnerable populations get ready for wildfires, earthquakes and floods, before disasters strike. (Listos means “ready” in Spanish.)

Emergency alerts are the cornerstone of readiness and all Californians should receive them. But in too many counties, few people do. To help, we created customized Disaster Directories for all 58 counties in both English and Spanish. Each directory provides:

- A brief profile of the county’s disaster risks
- Relevant vulnerabilities of its residents
- State and local alert resources for
  - General emergencies
  - Earthquakes
  - Wildfires
  - Public Safety Power Shutoffs
- Resources for people who are medically dependent on electricity
- State and county resources on COVID-19

Listos California hopes these Disaster Directories help bridge the gap between people in harm’s way and alerts that save lives. Please note that this directory is accurate as of the date on its cover. Be sure to check the status of any resource for the latest updates.

Karen Baker
Architect and Co-Chair of Listos California Emergency Preparedness Campaign
Senior Advisor in the Governor’s Office of Emergency Services (Cal OES)

Anchored at the California Office of Emergency Services, Listos California was launched in 2019 through an investment of public funds by Governor Gavin Newsom and state lawmakers. For more tools and tips to prepare for disasters, go to LISTOSCALIFORNIA.ORG.

- Orange highlights indicate county-specific resources.

COUNTY OVERVIEW  DISASTER RESOURCES  COUNTY RESOURCES  EMERGENCY ALERTS

EARTHQUAKE ALERTS  WILDFIRE ALERTS  POWER NOTIFICATIONS  COVID-19 RESOURCES
San Luis Obispo is often characterized by its diverse topography with 80 miles of shoreline, coastal territories, narrow valleys and several major mountain ranges. Due to significant changes in elevation and climate, weather conditions can vary greatly within the county, creating a high probability of severe weather events that include high wind events. All of San Luis Obispo County is at risk of extreme heat, which may precipitate drought conditions and increase the risk of wildland fires. Portions of the county can experience heavier rainfall amounts leading to localized flooding and landslide. Located in a seismically active region, there are a number of potentially active fault systems running throughout the county, creating the risk for a large-scale earthquake or tsunami.
### SAN LUIS OBISPO COUNTY BY THE NUMBERS

#### 45%
Area of the county classified as a high or very high wildland fire danger area.

#### 75%
Chance of a magnitude > 7 earthquake occurring in the next 30 years along the San Andreas fault, which runs along the eastern county border.¹

#### 65
Number of excessive heat events since 2015, resulting in $3,569,208 in crop losses.¹

#### 13,868
Acres burned in 16 separate wildfires in 2020.

#### 15
Dams located upstream of San Luis Obispo County; 10 of which are ranked as high hazard.³

#### 46%
Chance of a high-wind storm occurring in a given year.¹

WHAT ARE EMERGENCY ALERTS?

When emergencies and disasters strike, public safety agencies use different types of alerts to send emergency information to your cell phone, landline, radio or television.

What are the main types of Emergency Alerts?

- **Wireless Emergency Alerts (WEA)** are a national service that sends a vibration, loud tone and short message through your phone if an emergency is nearby. You must have a cell phone that is WEA enabled to receive alerts. You don’t need to sign up and there is no charge to you. You can check the settings in your phone to make sure the alerts are activated.

- **The Emergency Alert System** can be used by state and local officials to deliver important emergency messages to your TV or Radio.

- **Mass Notification Systems** like reverse 9-1-1 send an alert to your landline phone if you are in an affected area. Check with your city or county to see if you need to opt into this service.

- **Outdoor Warning Sirens** warn you to get inside immediately for more information. These can only be heard outside.

- **Weather Radios** will broadcast loud alert sounds during an emergency. If the power is out and your TV is not working, these radios can still broadcast continuous weather and emergency information specific to your area, 24/7.
LISTOS CALIFORNIA

About
Listos California is the state of California’s emergency preparedness campaign. (Listos means “ready” in Spanish.) You can find 5 easy steps to prepare for any natural disaster at their website. You will also find tips and tools to help you during the COVID-19 pandemic.

Website
listoscalifornia.org

Text
Text LISTOSCA to 72345 to receive tips in English or Spanish on how to prepare for natural disasters. You will receive one tip per day, at the time of your choice, over the course of one week.

CALIFORNIA EARTHQUAKE EARLY WARNING

About
The California Earthquake Early Warning System delivers warnings to Drop, Cover and Hold On via cell phones before the strongest shaking arrives. There are two ways to receive the alerts:

**WEA Alerts:** ShakeAlert messages can be sent to your cell phone or other WEA enabled devices, alerts that an earthquake is happening in your area. There is no need to subscribe.

**Free MyShake App:** You can download the free MyShake App which will send earthquake alerts to your cell phone or WEA enabled device when you do not have cell service but do have Wi-Fi.

Website
EARTHQUAKE.CA.GOV

Directions
1. Check your phone to make sure the alerts are activated.
2. Visit the Apple App Store or Google Play to download the application available in both English and Spanish.
3. Go to the System Settings in your cell phone or WEA enabled device, and make sure that location services are turned on.
